PROJECTS

Gemini AI Chatbot | GitHub | Live Server
Tech Stack: *Node.js, Express.js, Google Gemini API, dotenv*
- Built an Express.js server that receives user prompts, sends them to the Google Gemini API and returns the generated response to the frontend.
- Kept the API key server-side using environment variables (dotenv); added asynchronous request handling and error handling.
- Served the frontend through Express.js and deployed the full application live on Render.

Expense Tracker | GitHub | Live Server
Tech Stack: *React.js, JavaScript, CSS, Recharts*
- Built a responsive React app to add and track income and expenses with a running balance.
- Visualized transactions and spending with interactive Recharts charts.
- Built dashboard views for balance monitoring and spending summaries.

Interactive Quiz | GitHub | Live Server
Tech Stack: *React.js, JavaScript, CSS, Vite*
- Built a responsive quiz app with category-based questions.
- Implemented automated scoring, a quiz timer and dynamic result generation.
- Built question navigation and answer submission flow.
